

# Wisconsin 2002 All types of Broadband Offerings

2002 Reported Broadband Service

This map indicates all reported broadband offerings in the state, including CLEC, ILEC and Cable TV providers. There are distance limitations on all the broadband offerings so although an area is reported as having broadband not all customers in the area can obtain broadband service.

All companies indicated broadband service continued to be deployed in 2003 and into 2004.

Note: No comparison map is available from year 2000.
